Meet the T2.

The new standard in terminal tractors.
Technology driven, tested, human-centric design. Think about it. A purpose-built tool with the right mix of human engineering and technologically sound design is always the better choice. That’s the T2. We consulted with terminal tractor experts (our customers and industry leaders), applied advanced design processes, tested it, built in superior ergonomics, tested it again and, now, the revolution in terminal tractors begins.

Serviceability and ease of repair. Productivity is made up of more than performance and ergonomics. Serviceability and maintenance have to be parts of the equation, too. The T2 has been redesigned to accommodate both—it’s not only friendly from the driver’s seat, it makes routine service easy and fast, most of it from ground level. And, overall, repairs have become easier, as well. Put it this way...your operators and technicians will be happier and more productive.

Less “fat,” more efficient muscle. As part of the redesign, our engineers evaluated every aspect of the human/machine interaction and found ways to trim the unproductive “fat” and make the T2 more efficient. There has to be a balance of power, functionality and performance to complement the ergonomics and serviceability. Chassis, powertrain, hydraulics, electrical, HVAC...all T2 systems come together to make it the new standard in terminal tractors.

It all adds up to more productivity and a better bottom line. We created the T2 with clear focus on the end result—a terminal tractor redesigned and built to the needs of our customers. A more efficient, easier to operate and service, rock-solid, purpose built truck with a more productive operator environment. A “tool” that meets your business demands, delivers on a promise and makes sense for your profits.
We’ve always led with innovation... and pushed the envelope.

The Kalmar Ottawa T2 is a revolution of evolution in terminal tractor design and performance.

Invention and innovation go hand-in-hand. Kalmar Ottawa not only invented the terminal tractor, we’ve continually innovated with new engineering and design to make Kalmar Ottawa trucks the most reliable, best performing, purpose-built trucks in the business. Now, we’re continuing our innovative ways with a new truck design and features that will make others pale in comparison.

Increased Visibility.  We’ve increased the cab’s glass area to give operator’s better vision and provide safer operation. The windshield can be kicked out in case of emergency.

Mirror Post Design.  The T2 mirror post design is less obtrusive and helps provide safer operation.

Steel Cab Construction.  Kalmar Ottawa cab construction has always been based on high-quality steel construction. The T2 complements that high-quality steel construction. Steel Cab Construction.

An Interior Redesign that Works with Drivers.

Better Protection.  Operations are not only better protected from the elements, the T2 cab is ROPS compliant for increased rollover protection.

Cab Systems Access.  Front panel access has been redesigned to make cab systems service and repair easier and less time consuming. Removing a few bolts is all it takes.

Platform & Handrails.  Safety is primary to the T2 design. All operator mounting points have been optimized to make mount/dismount easier and more accommodating to drivers.

Serviceability.  Monitoring and servicing the T2 has been improved so that most tasks, such as oil and transmission fluid checks, can be accomplished from ground level.

3-Point, Tilt Cab.  The T2 utilizes our proven three-point cushioning system and electronic tilt to provide superior ride and service characteristics.

Faster, Stronger.  With spherical bearings both top and top quick lift cylinders along with stronger lift support construction, the T2 can lift trailers faster.

Improved Ergonomics.  The entire layout of cab components and environmental systems has been enhanced to make the T2 driver friendly and easier to control.

Modular Chassis Design.  The new T2 chassis features an open C channel design that provides more strength, better protection and less maintenance. All surfaces are powder-coated and its construction allows for easier installation and removal of components. Exhaust system components have also been moved inside the frame.

A Larger, Roomier, More Comfortable Environment with Everything in Easy Reach.

16-inch Steering Wheel. For better, easier to control in tight steering.

Suspended control pedals. Better design and operator control.

Switches & Add-ons. Driver-friendly rocker switches, ample space and electrical interfaces are available for yard management system devices.

Environment. The T2 HVAC system has been redesigned to afford more operator comfort—all new ducting and vents and improved cab insulation makes it comfortable and quiet.

Platform Systems Access. In addition to new, ground-level service points and the tilt cab, systems access from the truck platform is available through cab panels.

Tapered 3-Leaf Springs. With the addition of parabolic, tapered 3-leaf springs, the T2 rides smoother, drives better and requires no front spring lubrication.

Higher Capacity.  The new T2 chassis features an open C channel design that provides more strength, better protection and less maintenance. All surfaces are powder-coated and its construction allows for easier installation and removal of components. Exhaust system components have also been moved inside the frame.
