

Introducing at Mid-America Trucking Show:

The New EAST® BST II™

Stronger and lighter.

Some of our customers told us there was a need for an East flatbed with higher load ratings, but without adding weight.

The BST II meets these needs, and more. It is currently in our operational phase of road and dynamic load testing.

Haul more, make more.

With the BST II, you will be able to haul a wider variety of loads, both ways, greatly increasing your profit potential.

More feel behind the wheel.

The BST II will have more stability and less flex during cornering and maneuvering.
